

## **CHOOSING A PORTABLE GENERATOR POWER GUIDE**

Identify the items you need to power and determine the Total Wattage for all the items you will use

Choose a generator that powers up to 90% of your needs

**Onan P4500i** Peak Watts 4500 **Running Watts** 3700 52 dB Noise Level

Air Conditioner 1200-1800 watts

Circular Saw 500 watts

**Reciprocating Saw** 500 watts

Microwave

1500 watts

Belt Sander

1000 watts

Wet/Dry Vac 1440 watts

- Medium Appliances RV Use
- - Motor Sports

## Onan P9500df

Peak Watts **Running Watts** Noise Level

5

Air Conditioner

1200-1800 watts

O

9500 Gas, 8550 Propane 7500 Gas, 6750 Propane 74 dB

Air Compressor 1200-2000 watts

Washing Machine Power Washer 1300 watts 1500 watts

## **GREAT FOR:**

- Large Appliances
- Home Emergency Backup
- Food Trucks
- General Contractor Work Bulletin 5300168 7/19 ©2019 Cummins Inc.

This chart should be used as a general guide for items powered at one time. These wattages are estimates only.

Hair Dryer 1500 watts

Router 400-600 watts
